Cross Ice Program

The Cross Ice Program is a USA Hockey development system that is designed for boys and girls ages 3 through 6. Ice Hockey at this level should be based on having fun, participation by all, and being taught basic hockey skills. This program meets on Sunday afternoons. \$125.00 includes jersey.

Mite Program

3 on 3

The Mite Program is designed with the young players development in mind with the use of full ice. Games are played on a third of the rink, ensuring lots of puck control and non-stop action. This program is for birth years (01, 02) and meets on Sunday afternoons - the price for this program is \$125.00 includes jersey.

Practicing.

The children have more energy with which they can improve their skills when they are skating 85 feet across the ice surface as opposed to the 200 foot length of the ice surface. Group sizes become smaller which means learning and teaching will become more effective. More puck contact resulting in improved puck control skills.

Actual Games

Playing on a smaller rink results in increased puck possession time for each player. Scoring skills are enhanced since the players have more shooting opportunities and the child sized goal nets force the players to shoot more accurately. The feeling of being an important part of the action increases because of the small size of the rink.
